Shrink Packaging Machine Catalog

Fully automatic shrink packing machine designed for stacking, wrapping, and heat shrinking products in a continuous production process. The system provides efficient and secure packaging for bottles, cans, beverages, and other consumer goods.

Using advanced sealing and heat-shrink technology, the machine wraps products with film and shrinks it tightly around the package for secure transport and storage. The system supports PE and PVC shrink film and can operate with or without trays depending on packaging requirements. Reliable components and automated controls ensure stable operation and consistent packaging performance for high-volume production lines.

Specifications:

Shrink Packaging Machine

Specs	SY-4646-FA
Horizontal Height & Length of Infeed Conveyor (mm)	850±50 / 1500
Max package dimension (mm)	600L * 300W * 300H
Packing Speed (m/min)	0 - 12
Power Consumption	3Φ/220V/380V 50/60HZ 2KW
Air Source	0.6MPa (6Kg / cm ²)
Sealing time/temperature	0.5 – 1 S / 0-250°C
Width of film/thickness	MAX 650mm / 0.04-0.12mm
Dimensions (mm)	1500L * 2700W * 2000H
Net Weight (kg)	550
