Mini Type Blown Film Extruder Catalog

The Mini Type Blown Film Extruder is a compact extrusion system designed for economical production of small-width polyethylene films. Its simple structure and efficient screw design make it ideal for producing films used in shopping bags, T-shirt bags, and packaging applications.

Compact in size but highly versatile, this machine allows manufacturers to produce multiple film formulas or colors using several units in parallel. Its low investment cost and easy operation make it an excellent solution for startups and flexible production environments. Contact us to find the right configuration for your film manufacturing needs.

Typical Specifications:

Mini Type Blown Film Extruders

Specs	Mini Type Series
Film Width (mm)	100 - 800
Film Thickness (μm)	8 - 100
Output Capacity (kg/hr)	15 – 50
Screw Diameter (mm)	40 - 55
Screw L/D Ratio	26:1 – 30:1
Film Layer	1
Materials	HDPE/LDPE/LLDPE Film

Typical Auxiliary Equipment

- Auto material loader
- Masterbatch dosing system
- Rotary die head
- Bubble stabilizer / bubble cage
- Corona treater
- Embossing roller
- Automatic winder
- Double winder system
